Calories Burned Walking Moderately Calculator

Features of Calories Burned Walking Moderately Calculator Full Crack * Accurate : measurement of calories burned can only be accurate if measured accurately (by an accurate scale). This means that a scale with higher accuracy gives a more accurate measurement of calories burned. * Accurate measurement requires calibration. To ensure that we provide accurate results, we offer you the option to calibrate (measure) your weight, so that the measurement you get from the application is really accurate. * Elegant : the application is elegantly designed to fit in perfectly with the rest of your application. * Fast loading : by using the acceleration of your phone's processor, the calculator will load quickly, making it suitable for every day use. * Easy : if you don't have an accurate scale at your home, no problem! You can use the application to measure the number of calories burned at home. Simply enter the weight and time spent and the app will calculate the number of calories burned. * Swipeable : the calculator can also be viewed easily by swiping. * Feasible : this application uses the accelerometer of your phone, which requires no calibration, and are very accurate. We have tested the application using the accelerometer on a wide range of devices and obtained very accurate results. * Multilanguage : of course, the application is available in all official languages of Android. You can find the app in the store: Calories Burned Walking Moderately Calculator Serial Key questions Q: Are you sure that this Calculator application is accurate? A: No, it is not an accurate calculator. The number of calories burned are based on assumptions, and in the case of this calculator, it is based on the assumption that your weight is accurate. However, if it is not accurate, the results will be wrong (even if the information input by the user is correct). Q: Is this application free? A: Yes, it is free. Q: Can you tell me how this calculator works? A: We do not tell you the algorithm it uses to determine the number of calories burned, since this information is trade secret of the developers. We can only tell you that we have tested the application using the accelerometer and an accurate measurement of weight and time is needed in order for the application to calculate the number of calories burned (bas
